Room Darkening

The complete room darkening solution

If window light gets in the way of sound sleep, then the Shutter & Shade range from Plantation Shutters could be your new best friend. Ideal for shift-workers, or children who need to sleep during the day, these blinds reduce the external light greatly. Simply close your eyes and drift off into dreamland for a perfect, restful sleep.

Traditional 'black-out' blinds often let light seep in around the edges. The Room Darkening range is different. The blinds are housed snugly in recessed channels behind the shutters, so most of the external light bleed is eliminated... great news for daytime sleepers, and even movie buffs eager to re-create a cinema-like ambience.

About Shutter & Shade:

- Available in all our range
- Superior light reduction over curtains and blinds
- More insulating than just either shutters or honeycomb blinds by themselves
- Perfect for bedrooms, nurseries or home cinema setups and media rooms

The Shutter & Shade system:

Integrated with your plantation shutters

Lightweight, single honeycomb cell construction

Child safe consolidator fitted as standard

Blind fits snugly in a recessed channel
